

Quality Policy

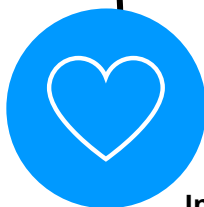

Mission

To develop innovative automation technologies that improve global health outcomes.

Vision

To provide solutions for repetitive laboratory diagnostic processes.

Values

Commitment: satisfy the requirements of our customers, apply the current legislation to all our activities and maintain the effectiveness of our quality management system.

Staff: train, raise awareness, motivate and provide experience for all our staff.

Innovation: constantly incorporate new technologies and processes to generate new effective products.

Quality: implement a quality management system based on continuous improvement.

Environment: respect the environment, improve and prevent pollution and optimize consumption.

Labor safety: continuously improve the prevention of damage and health deterioration.

Ethics: guarantee ethical behavior in all our actions and implement corporate social responsibility and equal opportunities.
